

# VERIFICATION OPINION OF GREENHOUSE GAS STATEMENT

Opinion No.:  
00013-2024-GHG-RGC

Date of issue:  
9 February 2024

Page 1 of 5

This is to verify initiate reporting of Greenhouse Gas Emissions Inventory Report (2022) of

## **SunWell (Jiangsu) Carbon Fiber Composite Co., Ltd.**

### **Scope of Verification**

DNV Business Assurance (DNV) has been commissioned by SunWell (Jiangsu) Carbon Fiber Composite Co., Ltd. (hereafter the "Company") to perform a verification of its GHG Emissions Inventory Report (2022) (hereafter the "Inventory Report") in China, the scope of the verification is set to the reporting boundary covered by this Inventory Report, as detailed in Appendix A&B of this opinion.

### **Verification Criteria and GHG Programme**

The verification was performed on the basis of ISO 14064-1, as well as those given to provide for consistent GHG emission identification, calculation, monitoring and reporting. The implementation process of the verification, is in accordance with the requirements of standards of ISO 14066:2023, ISO 14065:2010 and ISO 14064-3:2019 etc.

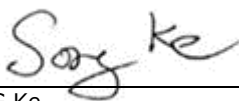

### **Verification Opinion**

It is DNV's opinion that the Inventory Report (2022), which was published on 8 December 2023, is free from material discrepancies in accordance with the verification criteria identified as stated above. The opinion is decided based on the following approaches,

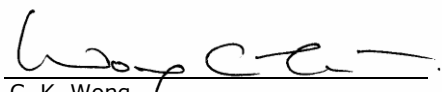

- For the Direct GHG emissions (Category 1) and Indirect GHG emissions from imported energy (Category 2), the reliability of the information within the Inventory Report (2022) were verified with reasonable level of assurance.
- For the other Indirect GHG emissions (Category 3&4), the involved information was verified and tested using agreed-upon procedures (AUP).

In addition, the information listed in attached Appendix A&B&C were also verified during the process.

## Supplement to Statement

### Process and Methodology

The reviews of the Inventory Report and the subsequent follow-up interviews have provided DNV with sufficient evidence to determine the fulfilment of stated criteria.

### Quantification of Greenhouse Gas Emission

The Inventory Report covering the period 1 January to 31 December 2022, it is DNV's opinion that the Inventory Report results in quantification of GHG emissions that are real, transparent and measurable.

### Organizational Boundary of Verification

Financial Management Control  Operational Management Control  Equity Share

### GHGs Verified

CO<sub>2</sub>  CH<sub>4</sub>  N<sub>2</sub>O  HFCs  PFCs  SF<sub>6</sub>  NF<sub>3</sub>

GHG Inventory Categories	Amount (tCO <sub>2</sub> e)
Category 1 - Direct GHG emissions <sup>1</sup>	49.79
Category 2 - Indirect GHG emissions from imported energy <sup>2</sup>	1,331.54
GHG emissions of Category 1 & 2	1,381.33
Category 3 - Indirect GHG emissions from transportation	36.66
Category 4 - Indirect GHG emissions from products used by the Company	22.66
<b>Total Emissions<sup>3</sup></b>	<b>1,440.65</b>

- For details of the Direct GHG emissions please refer to Annex C;
- The electricity consumption related indirect emissions from imported energy were calculated by the factor of 0.5703 ton CO<sub>2</sub>/MWh (2022) which was required by Ministry of Ecology and Environment of PRC;
- The Global Warming Potential (GWP) defined in IPCC AR6 has been chosen and referred by the Organization.

### Verification Opinion

Verified without Qualification  
 Unable to Verify

## APPENDIX A

The GHG statement proposed by the reporting entity for this Inventory Report includes the following addresses:

No.	Facility	Address	Total emissions tCO <sub>2</sub> e
1	SunWell (Jiangsu) Carbon Fiber Composite Co., Ltd.	No. 26, Xiexin Road, Funing County Economic and Technological Development Zone, Yancheng City, Jiangsu Province, China.	1,440.65

## APPENDIX B

The reporting boundary of the Inventory Report (2022) is identified by organization as :

Category	Reporting Boundary*
1. Category 1 - Direct GHG emissions	Fuel usage from vehicle, septic tanks and refrigerant fugitive. These facilities and process were owned or controlled by the reporting entity within its organizational boundary.
2. Category 2 - Indirect GHG emissions from imported energy	Indirect emissions from imported electricity;
3. Category 3 - Indirect GHG emissions from transportation	Upstream transportation of raw material and subsidiary material.
4. Category 4 - Indirect GHG emissions from products used by the Company	Purchased solid waste (incl. hazardous waste, scrap molds, paper, and municipal solid waste) treatment service.

\*The scope of other indirect emissions (excl. imported energy with designated/limited source) is determined by the reporting entity based on predetermined criteria for assessing significant indirect emissions and considering the intended use of its GHG inventory.

## APPENDIX C

For direct GHG emissions and removals, the quantified results for each GHGs are as follows, in tCO<sub>2</sub>e units.

CO <sub>2</sub>	CH <sub>4</sub>	N <sub>2</sub> O	HFCs	PFCs	SF <sub>6</sub>	NF <sub>3</sub>	Sum
16.00	8.83	0.47	24.48	0.00	0.00	0.00	49.79
32%	18%	1%	49%	0%	0%	0%	100%
